Dear Parent:

Another exciting year is coming to an end for students, parents and teachers at Metcalf. Although the year began with some uncertainty, as a result of our problems last year, we have grown and prospered together. Our program has received recognition from the state and North Central Accrediting Association and we have received many positive suggestions for improvement from the on-site visitations of these agencies. Research and development at Metcalf has been increased and refined. Facilities were made available to the Kellogg Center for the creation of a Teacher Analysis Laboratory designed to improve the quality of teaching throughout the university. At the present time we are in the midst of a mission review which should help us to be of even more service to Illinois State University. This has been a year in which we have amply demonstrated the need for an active laboratory school.

This has also been a year of opportunity for our children. We completed our third year in the Artists-In-School program with the Acme Dance Company and two movement specialists. The children are enjoying a new arithmetic series which is being pilot tested in the first through sixth grades. The fifth and sixth grades are pilot testing a new spelling series. The children have gained much through their personal contact with one of the authors and the public schools have had an opportunity to observe children using the materials before making their decisions to adopt a particular text. All areas of the curriculum have been reworked as a result of new staffing plans and a coordinated program development is planned for the near future.

Much of the credit for a successful year may be attributed to the continued interest and support from parents and friends of the lab schools. On behalf of the faculty the administration would like to take this opportunity to thank you for your loyalty. We look forward to even more progress in the years to come.
